

# Quick Start Guide

For a full manual of the UBI-7K, please visit our website at [http://www.globaltrackinggroup.com/company\\_support.cfm](http://www.globaltrackinggroup.com/company_support.cfm)

**Welcome to Global Tracking Group.** With a few quick and simple steps, you will be using your new UBI-7K for real time GPS tracking. Just follow the instructions below for fast setup or visit our website at [http://www.globaltrackinggroup.com/company\\_support.cfm](http://www.globaltrackinggroup.com/company_support.cfm) for a full UBI-7K manual.

## Getting Started

Often times your UBI-7K will come fully charged. To check the charge level, plug in the UBI-7K and if the battery light **6** remains solid, it is fully charged. If it flashes fast, it is in need of charging and let it continue to charge until it turns solid. After charging is complete, if you haven't already done so, use the automated email you received after completing the sale to create your username and password for access to the mapping application. Your password should be at least 8 characters and contain alpha-numeric characters.

- 1 On/Off:** By holding this button for 3 seconds the UBI-7K will turn on. Hold again for 3 seconds to turn off.  
**Note: After charging the unit, power will remain on. Turn your unit OFF if not needed.**
- 2 Power port/Antenna:** When needing to charge the UBI-7K, use this mini USB port with the included wall charger.
- 3 SIM Slot:** SIM card for sending GPS fix data to Global Tracking Group mapping application.
- 4 SOS:** Hold this button for 3 seconds and an SOS alert will be sent to the preconfigured email addresses or phone number for SMS messages in the GTG mapping tool. (see full instructions for setting up)

**5 GPS Led:**

GPS has satellite fix	Solid
GPS is in fixing to the satellites	Fast flash
GPS is on and GPS data wrong	Slow flash
GPS is off	No lights

**6 Battery Led:**

Power on and normal	No lights
Charger Inserted and charging completed	Solid
Charger inserted and charging	Fast Flash
Power key was pressed and preparing to power off	Fast Flash
Power low alert	Slow Flash
